## **Organizational Issues and Sexual Harassment: It's not about just Sex"**

It seems like not a day goes by without the alarming prevalence of sexual harassment behavior in our workplaces, schools and other places in our surrounding environment. Victims of sexual harassment are not simply speaking up; they are now standing up, speaking out and making sure their voices are heard. Since the mid-1970s, sexual harassment is considered a form of discrimination based on sex in the United States. Recently, more and more cases have been brought to the public's attention because people are saying "enough is enough." Sister Connection is happy to host an evening of candid discussion and conversation to help our congregation, family and friends learn to identify sexual harassment and ways to prevent or combat this issue.
